Dear Valued Customer,

Subject: Micro Plastics .550" to .610" High Profile Edgecard Connectors

The following changes have been made to the .550" to .610" profile Micro Plastics edgecard connectors supplied to your firm:

1. No standoffs are located in the center portion of the connector.
2. A round hole in the position 1 location has replaced a square hole.
3. No last position location hole.

The above changes do not affect the form, fit or function of the connector.

These changes will enable us to improve customer service related to our delivery of connectors

A handwritten signature in black ink, appearing to read "M. Hulbert", followed by a long horizontal line extending to the right.

Marshall Hulbert
QA/Engineering Manager
